Top 5 Reasons to Major/Minor in German@Emory

✓ Mentorship
Classes are kept small to allow for personal relationships with professors, which equates to more informed letters of recommendation for business school, grad schools, and future jobs. Majors and minors can also network with the German-speaking business community in Atlanta through our mentorship program.

✓ Advanced language abilities
The German Studies Department is a designated National Center of Excellence due in large part to its undergraduate curriculum that develops advanced language abilities, opening doors to international careers as well as graduate educational opportunities in the German-speaking world where there is little to no tuition.

✓ Internships
Only German majors and minors are eligible for the popular AmCham internships, which place several Emory students in paid positions with companies in Germany every summer.

✓ Research opportunities
Our faculty is eager to have students conduct research in German Studies and make scholarly connections with other disciplines on campus through the SIRE and honors programs. Almost 90% of Emory German majors have a double major, and we can help you develop a research agenda that bridges your different fields of study.

✓ Study abroad
Study for a semester in Berlin, Vienna, or Freiburg or in Vienna during the summer. Courses taken abroad count toward the German major and can accelerate completion of the major or minor. In our Vienna summer program, now in its 41st year, students live with host families and study German in one of Europe’s great cities. Scholarships available!
